

UG21 Engineering is a company specialized in the design and supervision of airport projects.

We are present in Peru, Colombia, Mexico, Costa Rica, and Nicaragua, as well as in Spain, with offices in Sevilla and Madrid.

Since our establishment in 2001, we have been involved in over 75 airports, notably supervising projects such as the TWR El Dorado in Bogotá (80 m) and AIFA in CDMX (90 m), as well as drafting over twenty master plans, terminal designs, runways, etc.

We have a staff of over 300 employees, surpassing 12 million euros in sales in 2023.
