

Exolum is an independent logistics operator with more than 90 years of experience in the industry carrying out all aspects of aviation fuelling services such as into-plane, M&O of aviation fuel infrastructures, design, construction, and investment, among others. It operates in 36 airports in Spain, Dublin and Shannon Airport in Ireland, 6 Airports in Panamá, Guayaquil Airport (Ecuador), Lisbon Airport (Portugal) and is building and will operate the new fuel storage plant at Jorge Chávez airport in Lima. Recently, it has been awarded the operation and maintenance of the fuel terminal at Paris-Charles de Gaulle Airport.

Exolum provides ITP services through direct contract with Airlines, offering better and more competitive conditions as well as a direct relationship for a better management of the operations. Exolum has a growing presence in the aviation industry and is looking for new opportunities to expand its activity.
